ADM NS OPS Feb 11 Read out

Communications

- MB has written PM letter on situation in Emerson. PCO IGA needs input urgently on federal actions to date.

s.38 [REDACTED]

- FPT table with DMs leveraged on Monday and there is now pressure for a follow up meeting.

s.39

- Workaround on Ambassador Bridge – GM is planning to move goods across border using ferries. “one coast guard approach” may be able to provide ice breaking capabilities
-

Protection of Officials

- Nothing new to add today.

Peaceful Event

- TC has started some work on tow trucks started with PS and PSPC.
- **Windsor:** Request came out for additional resources. OPP and RCMP have deployed resources (as have Hamilton and York).
 - o The intended operation today did not take place - area where intended action was to take place is located next to school walkouts in support of protest were ongoing.
 - o This creates challenges with the intersection of lawful protest, illegal activity and children involved.
 - o Southbound lane open but police not allowing local traffic as not safe.
- CBSA is continuing to track activity across POEs. Planned protests or active protests at all but one commercial POE.
 - o CBSA continues to have enhanced vigilance efforts at border to ensure no one entering is a cause for concern.

s.38

- CBSA only has OSINT to understand and predict future POE and CI blockages.
 - o Focusing on highest volume POE, but very difficult to do.
 - o There have been lots of slow rolling protests but only blockades creating real issues.
- Public Safety is pulling together list of critical infrastructure (i.e., where protesters could they go and create havoc).
 - o List will be evergreen.
- There are not yet reliable projected numbers for Ottawa this weekend.

IMVE/Threat Update

- No change in previous reporting.
